

MEMORANDUM

To: Mayor and City Council

From: David Elliott, Stormwater Manager

Date: September 8, 2014

Subject: **Discussion of Stormwater Inventory and Survey Contract**

ITEM DESCRIPTION

Discussion of 4 year Stormwater Inventory and Survey Contract.

BACKGROUND

The City of Dunwoody is required by its Phase II MS4 Permit through the Georgia EPD to re-survey 20% of the storm drain system within the City limits annually. The data collected during this survey is also critical to the planning of the Stormwater Department. This request for proposal is for the services required for this inspection. This contract would accommodate the next 4 years of required survey, which is also the length of our current Phase II MS4 Permit.

RECOMMENDED ACTION

Proposals for these services were received by a total of 7 contractors on September 2, 2014. The proposals are currently under review by staff for qualifications, past experience, cost, and project approach. Staff will have a recommendation for City Council on or before September 8, 2014.
